

INSTRUCTIONS FOR COMPLETING PART B:

General Instructions - Type or print the information. A separate Part B is to be **completed** for each major business activity. Examples of major business activities are: paint manufacturing, metal plating, food canning, et cetera.

B1. Business Activity - Describe the principal activity on the premise. For the purpose of completing this Part, an activity is a major business class of manufacture (see Examples above). Enter the Standard Industrial Classification (SIC) Code Number, as found in the 1972 Edition of the Standard Industrial Classification Manual prepared by the Executive Office of the President, Office of Management and Budget, which is available from the Government Printing Office at Washington, D.C. or at San Francisco, California - **DO NOT USE PREVIOUS EDITION OF THE MANUAL**. Copies are also available for examination at most public libraries.

- (a) Product - List the types of products, giving the common or brand name and the proper or scientific name. Enter from your records, the average and maximum daily amounts produced for this activity for the previous calendar year, and the estimated production for this calendar year. Attach additional pages if -necessary.
- (b) Description - Describe the wastewater generating process occurring on the premises, including any seasonal variation in wastewater discharge volumes, plant operations, raw materials, and chemicals used in process and/or production.

EXAMPLE: At this location we manufacture paints, by a dispersion process in which pigments (magnesium silicates, iron oxides, titanium dioxide and organic pigments) are incorporated into a liquid media consisting of binders (alkyd, phenolic vinyl, acrylate and polyether) and thinners (acetate, aliphatic and/or aromatic hydrocarbons as well as water). All raw materials are purchased from an outside supplier. Production is uniform throughout the year. Wastewater is generated for discharge to the community sewer from the washing of the mixing vats. Consequently, all raw materials and products can find their way into the community sewers.

- (c) Substance Proposed to be Discharged - Give common (brand names) and technical names (chemical, scientific or proper names) of any materials and products proposed to be discharged to the sewer. Under "description," briefly describe the physical and chemical properties of each substance.

B2. Discharge Period

- (a) Enter the hours of the day during which waste from this Business Activity will be discharged to the sewer: e.g. from 0600 to 1700 hours (not 6 a.m. to 5 p.m.).
- (b) Circle the days of the week that the wastewater discharge from this activity occurs.

B3. Variation in Operation

Indicate whether the business activity is continuous through the year or if it is seasonal. If the activity is seasonal, circle the months of the year during which discharge occurs. Make any comments you feel are required to describe the variation in operation of your business activity.

B4. Other Liquid Wastes - List the type and volume of liquid wastes removed from the premises other than by the community sewer. Under description, indicate the type of materials (scientific & common names) in the waste. Also, in the column headed "REMOVED BY," write the name and address of the company who hauls this material. If you do your own removal and disposal, indicate by writing your "Business Name."
